INDUSTRY

NEW!

# NINJA 23

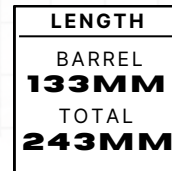

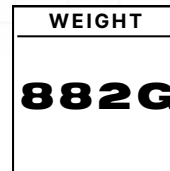

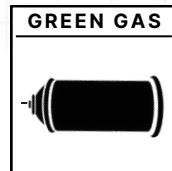

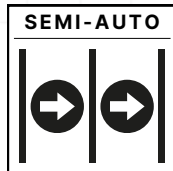

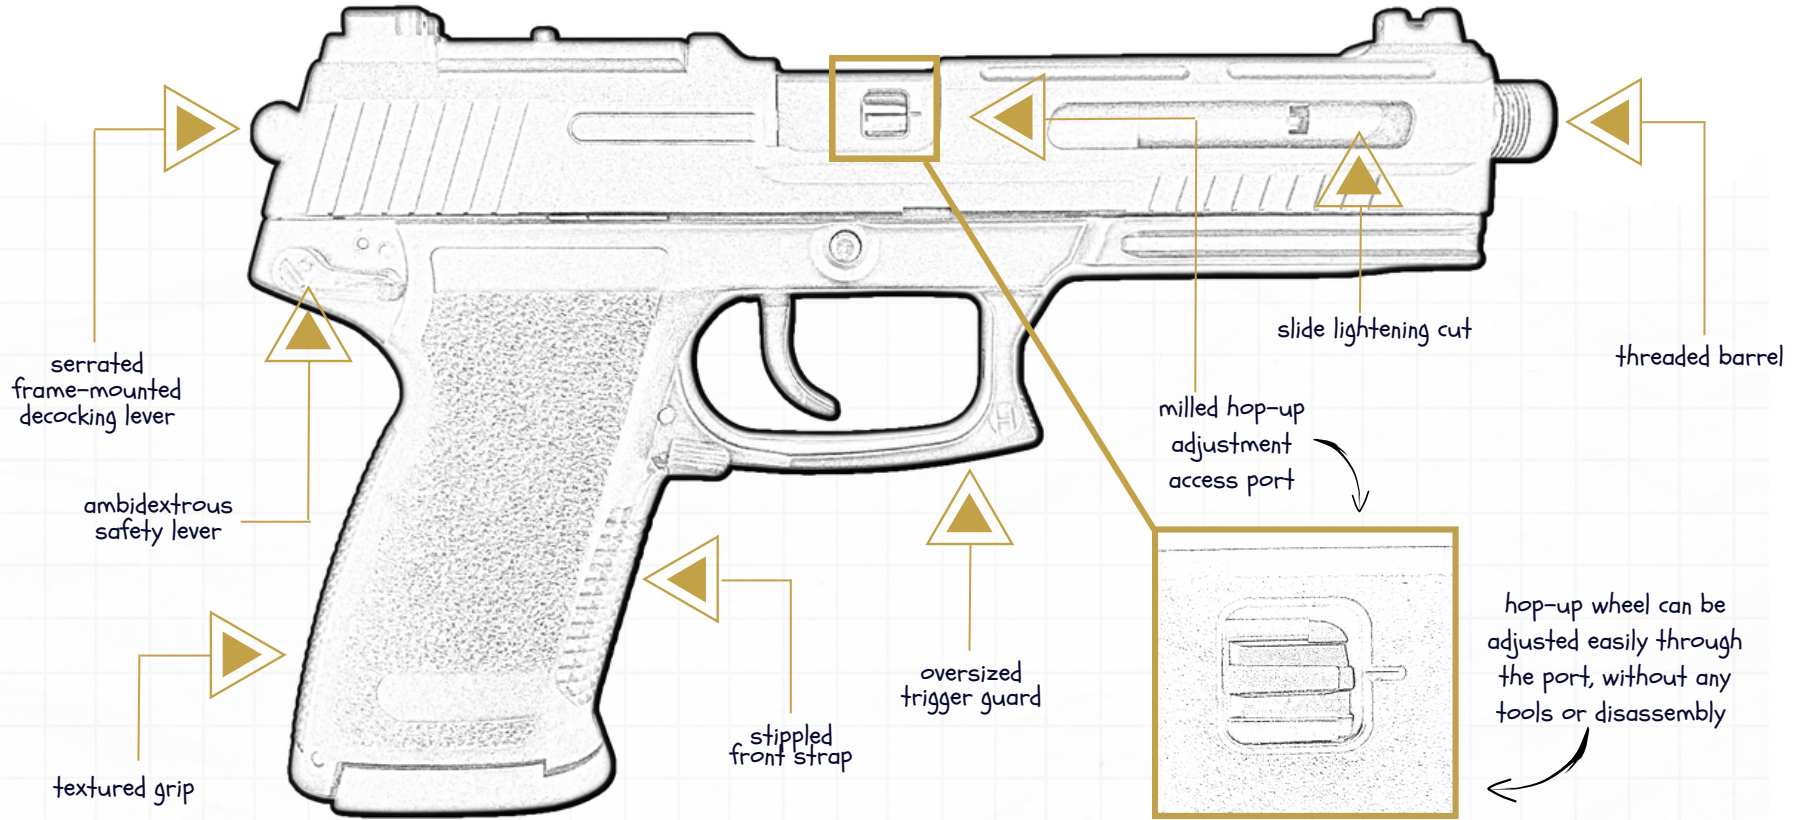

hop-up  
adjustment  
access port

The Ninja 23 features a CNC aluminum slide with lightening cuts that makes it competition ready due to the high strength-to-weight ratio. The slide also comes standard with advanced fiber optic sights, with a green front sight and a red rear sight.

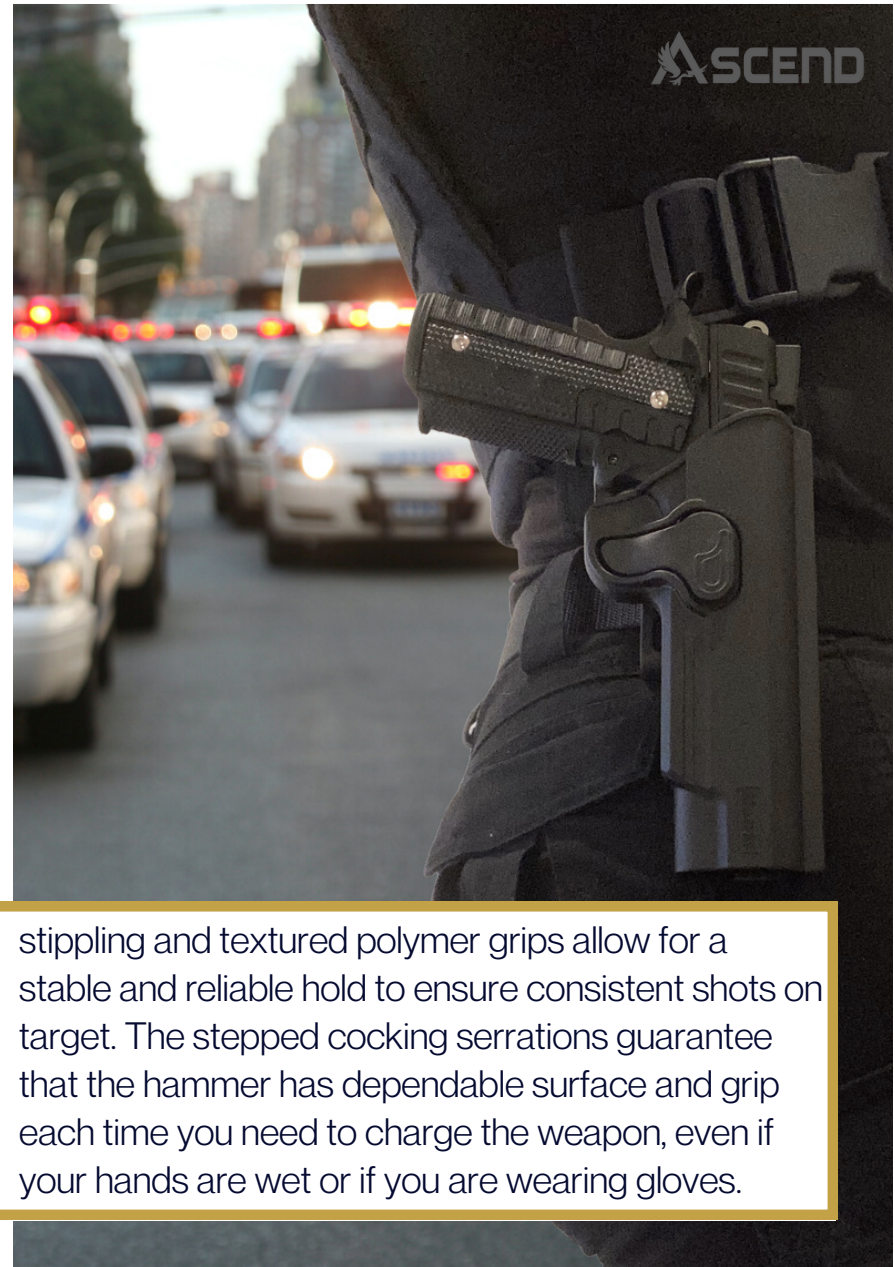

internal system--a Maple Leaf hop-up chamber set and a 133mm tight Inner barrel. A special slide cut allows for easy hop-up adjustment without having to disassemble anything. The slide is also RMR-ready and the threaded barrel allows for the addition of suppressors and tracer units.

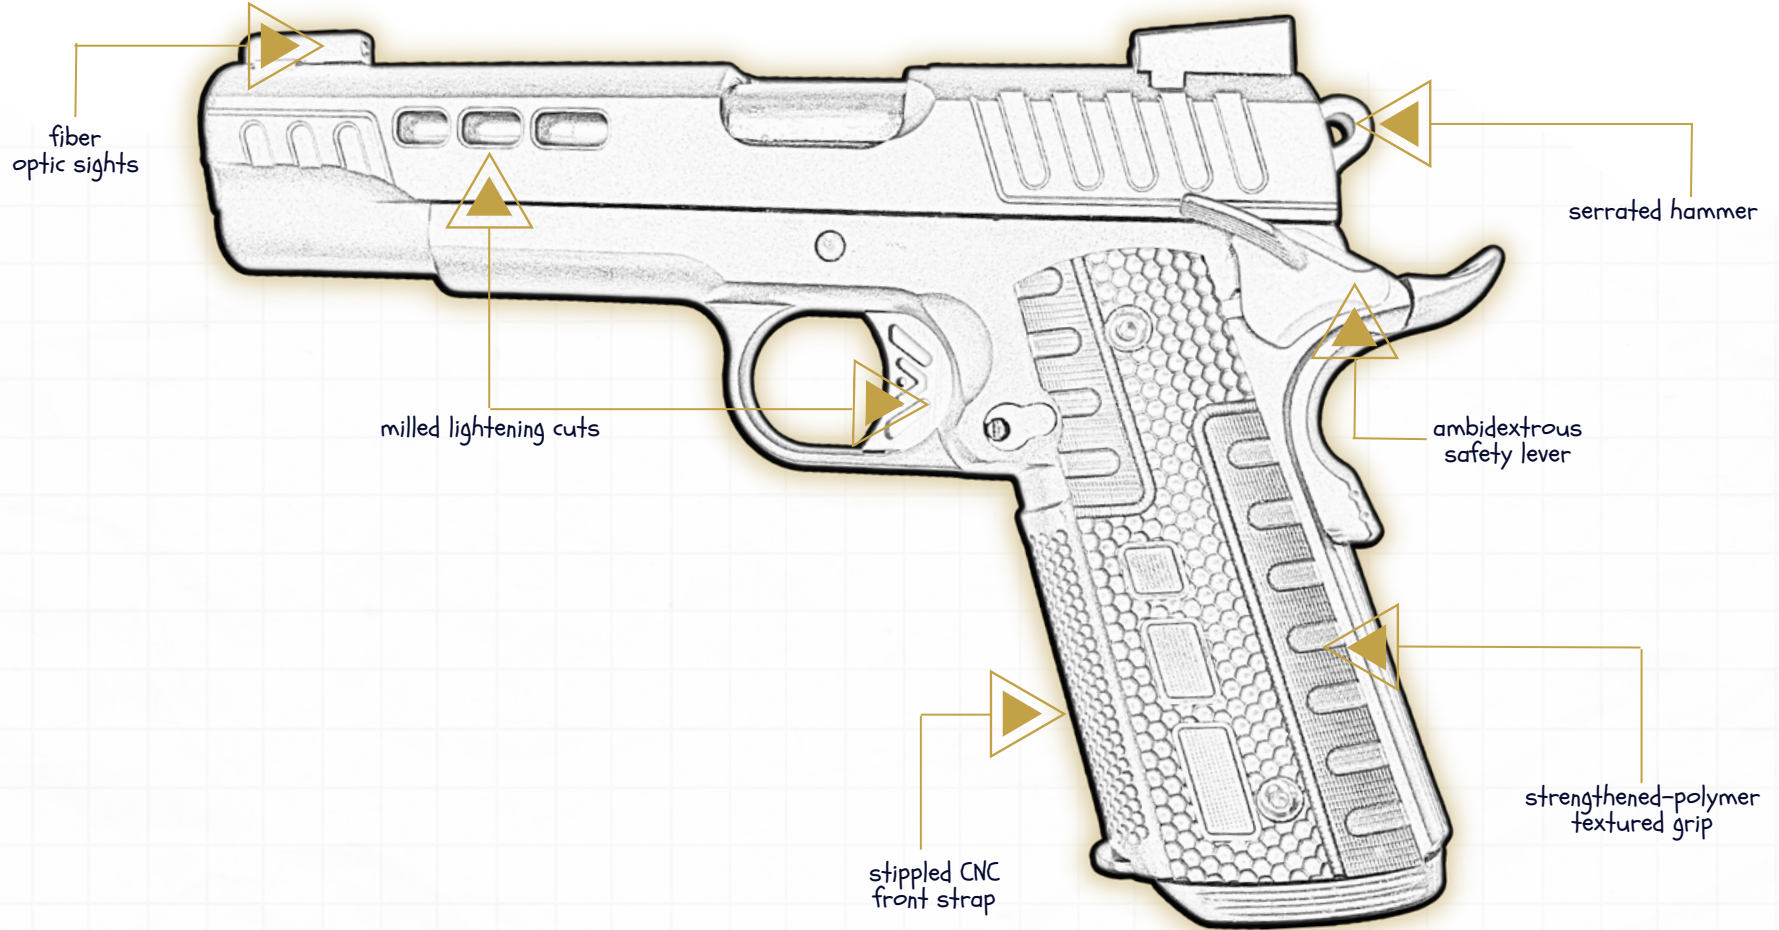

# KP 1911

The KP 1911 is Ascend's take on a classic, American pistol design. It is extraordinarily reliable and effective in a wide array of situations. Speed and accuracy in shots can be credited to the CNC precision-milled slide and trigger lightening cuts, while the front strap

stippling and textured polymer grips allow for a stable and reliable hold to ensure consistent shots on target. The stepped cocking serrations guarantee that the hammer has dependable surface and grip each time you need to charge the weapon, even if your hands are wet or if you are wearing gloves.

# DP 17

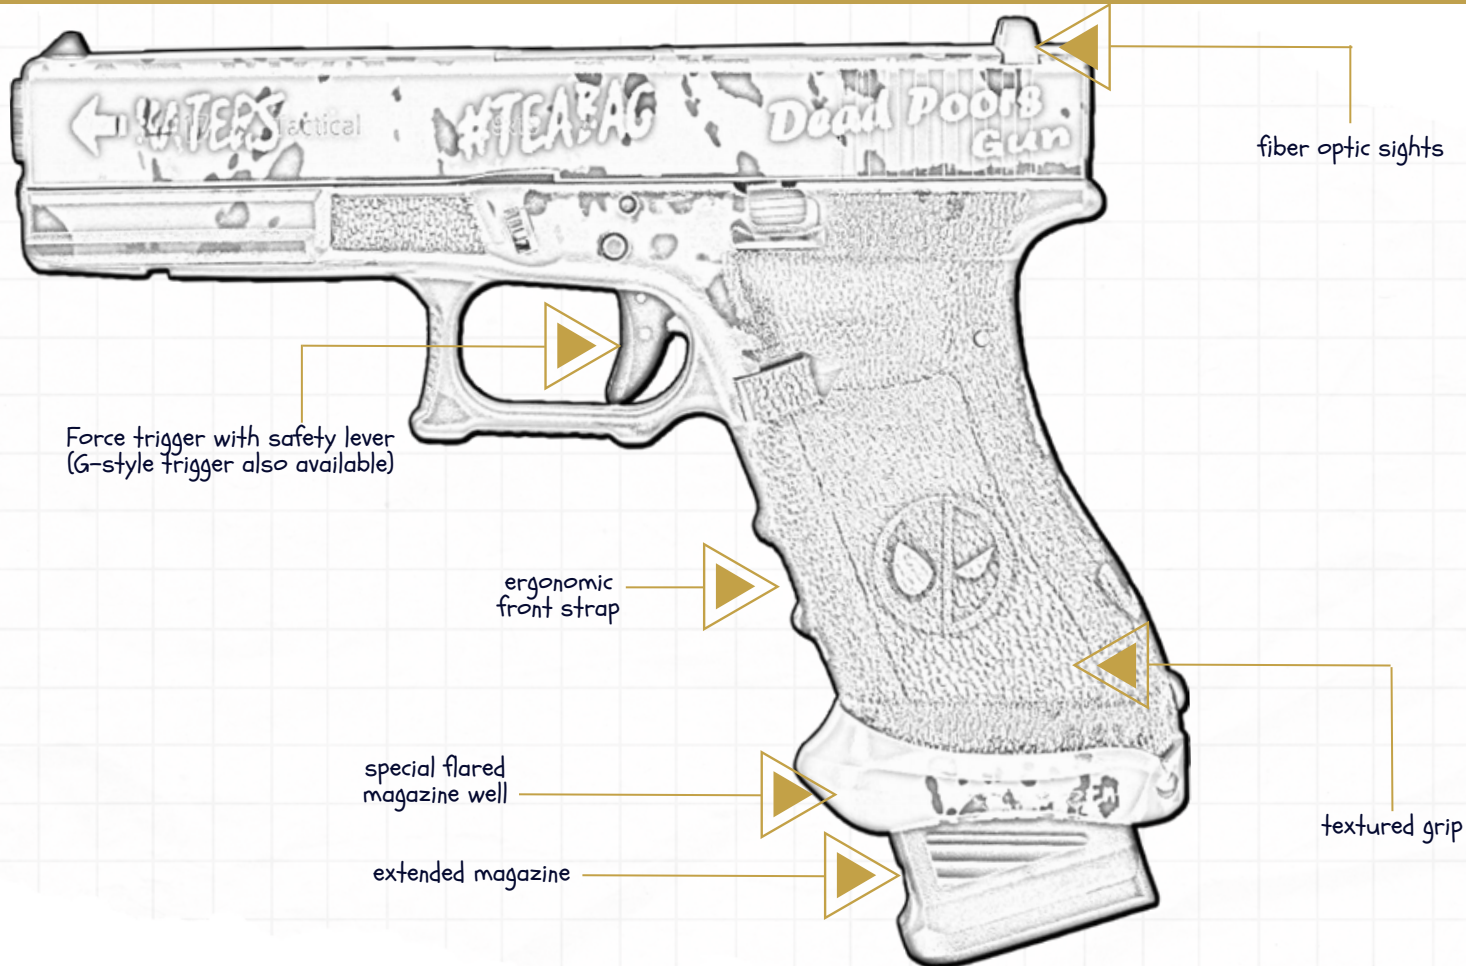

ASCEND

Ascend's DP 17 is an essential gun for true comic fans! The metal slide houses fiber optic sights on the front and rear, with a green fiber front sight and a red fiber rear sight. The reinforced polymer receiver has been treated with a superior computer art transfer process to

display favorite comic slogans. The DP 17 also has a stippled front grip above a specially-designed flared magazine well. This pistol is available with Ascend's Force trigger or a G-style trigger. The Force trigger is an upgraded addition to the pistol and has a red safety lever built-in.

# DP 17 FORCE

The DP 17 Force was designed with attitude, speed, and efficiency in mind. The metal slide possesses milled, lightening cuts for enhanced rapidity with each shot taken, and the green front and red rear fiber optic sights ensure each of those shots is on target, even in low light

conditions. The flared magazine well is also designed for quickness with its wide base that allows for easier reloading and building muscle memory. Ascend's Force trigger comes standard in the DP 17 Force models, adding a safety lever to prevent negligent discharges in high-speed competition-style shooting.
